ALLOWANCE

The following is an Allowance in response to Applicant's Request for Continued Examination filed on 2/17/2009 and Applicant remarks filed on 8/6/2009. Claims 1-14, and 43-44 are pending and allowed below. Claims 15-42 are cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a system and method for planning repairs in response to demand for repair locations for unserviceable parts in a multi-level repair network.

The closest prior art of record is Huang et al. (US Patent No. 6,151,582) and Narimatsu et al. (US Patent No. 5,826,236). Huang et al teaches a decision support system for the management of an agile supply chain, which incorporates a demand management and an equipment repair supply chain analysis. Narimatsu et al teaches a method for allocating resources and processes for scheduling production plans, which incorporates a program evaluation and review technique (PERT) calculation to perform time evaluation on each resource allocation. Applicant's arguments filed on 8/6/2009 (see pages 16-18 in particular) are deemed to be persuasive and adequately reflect the

Art Unit: 3624

Examiner's opinion as to why claims 1-14, 43 and 44 are allowable over the prior art of

record.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Jayaraman et al (US Patent No. 5,287,267), regarding method for parts

procurement where demand is uncertain for the product in which the parts are used.

Sheldon et al (US Patent No. 5,765,143), regarding method and system for

inventory management.

Suzuki et al (US Patent No. 5,965,858), regarding manufactured article

recycling/reuse system and storage methods.

Yang et al (US Patent Application Publication No. 2001/0034673), regarding service parts inventory planning and management.

Gupta et al (US Patent Application Publication No. 2004/0093287), regarding optimal demanufacturing planning that maintains an inventory of parts to satisfy demand.

Birjandi et al (US Patent No. 7,210,624), regarding redistribution of parts in a distribution network and various locations.
